Lab Task 04: Product Information Box

Instruction:

- 1. Complete the task**
- 2. After completion, push the code in the GitHub repository.**

Scenario:

You're creating a Product Display Section for an online store. Products should appear as neat cards side by side, with spacing, borders, and hover outlines.

Steps:

1. Create a page showing three product boxes (for example: Laptop, Headphones, Smartwatch).
2. Each product box should include:
 - A small product image
 - Product name (heading)
 - Short description
 - Price
 - A link saying "Buy Now"
3. Use display: inline-block to show multiple boxes in one row.
4. Style each box with:
 - Border and background color
 - Padding inside each box
 - Margin between boxes
5. Add an outline effect that appears when hovering over the box (outline and outline-offset).
6. Use text-align: center to align content inside boxes.
