**Lab Task 08: Dynamic Form Field Display**

**Instruction:**

- 1. Complete the task**
- 2. After completion, push the code in the GitHub repository.**

**Scenario:**

You are designing a Smart Registration Form that adjusts based on user type. Only relevant fields should appear, making the form cleaner and easier to fill.

**Steps:**

- Create a dropdown with two options: Student and Teacher.
- Below the dropdown:
  - Add an input field for Roll Number (hidden initially).
  - Add an input field for Department (hidden initially).
- When user selects:
  - “Student” → show Roll Number, hide Department.
  - “Teacher” → show Department, hide Roll Number.
- Use `style.display = "block" or "none"` for showing/hiding.
