**Lab Task 07: Sticky Header Page**

**Instruction:**

- 1. Complete the task**
- 2. After completion, push the code in the GitHub repository.**

**Scenario:**

You are designing a Blog Page for a tech site. The site's header must stay visible while users scroll through long articles.

**Steps:**

1. Create a webpage with a long scrollable content section (use multiple paragraphs or dummy text).
2. Add a header at the top with a site title and a few navigation links.
3. Use **position: sticky** and **top: 0** on the header.
4. Add a background color, padding, and border-bottom for visibility.
5. Ensure the main content has enough top margin so text isn't hidden under the header.
