**Lab Task 05: Fixed Contact Widget**

**Instruction:**

- 1. Complete the task**
- 2. After completion, push the code in the GitHub repository.**

**Scenario:**

A company website wants a floating contact widget visible at all times. Visitors can easily reach support even when scrolling long pages.

**Steps:**

1. Create a small box that contains:
  - Text “Contact Us”
  - A phone number and email link
2. Use position: fixed to place the box at the bottom-right corner.
3. Add padding, border, and background color to make it stand out.
4. Use z-index to keep it above other content.
5. The widget should remain visible when scrolling.
6. Add a hover effect that changes background color.
