

Lab Task

A company wants to automate the initial evaluation of employee leave requests. Employees will submit a simple online form specifying their name, department, and number of leave days requested. Based on company policy, leave requests of 5 days or less are automatically approved, while longer requests are marked for manual review.

Task Requirements

HTML Requirements

- Employee Name
- Department
- Number of Leave Days
- Submit button

PHP Requirements

- Retrieve form data using `$_POST`
- If leave days $\leq 5 \rightarrow$ Display **Leave Approved**
